

## WHY YOU'LL LOVE OUR TILE AND GROUT CLEANINGS!

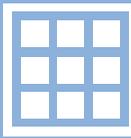

### Amazing Results

We'll wipe away years of grime and dirt!

### Powerful Protection

Our sealers keep grout in fantastic condition

### Safe for All Tile

Natural Stone, Ceramic, Porcelain - we clean it all!

## Keep Your Floors Clean And Your Home Healthy

No matter how often you mop, over time a tile floor will develop a thin layer of impacted soil. This coating dulls the tile and darkens the grout, diminishing the natural beauty of your floor.

Our powerful, safe cleanings remove that layer of impacted grime. We restore the floor and make your tile look wonderful again!

## Tile & Grout Cleaning

## From Grime to Shine!

Oxi Fresh Can Make Your  
Tile Beautiful Again

## LET US RESTORE YOUR FLOOR!

Tile floors have a hard life. They have to look good and deal with the heavy traffic and frequent spills seen in kitchens, entryways, and bathrooms.

Over time, these floors lose their original beauty as dirt and oils become embedded and impacted. The lovely kitchen floor becomes dim, the sunroom looks dull, and the bathroom dingy.

**But Oxi Fresh can SAVE your floor!**

Our powerful cleaning system scrubs away the grime, leaving your floors fresh and clean. Enjoy your home again - let Oxi Fresh revitalize your tile and grout!

## HOW OXI FRESH CLEANS TILE AND GROUT

Our process was designed to clean without compromising the strength of the tile and grout.

1

Any loose debris is removed with a thorough vacuuming.

2

We then apply our specialized solutions that rapidly but safely break down the oils and dirt on the tile and grout.

3

After letting the product dwell we scrub to break up any remaining grime, extract the debris, and rinse any residue.

4

We then can apply a sealant to your grout lines that protects grout for up to two years!

### FROM CERAMIC TO STONE

Whether your floor is ceramic, natural stone, or porcelain, Oxi Fresh can treat it safely and effectively.

Our products and methods were specially designed to clean nearly every kind of floor out there without compromising the strength or integrity of the tile and grout.
